

LOCALCHECK BRAND ASSET SHEET

One accent, one identity. Sport is metadata (a badge on a profile), not a coloring system.

1 — LOGO & IDENTITY

Simplified back to one accent. Two sport colors on the mark read like a holiday badge — the brand needs to stay singular so it doesn't compete with anything. Tight viewfinder brackets, off-white. Orange checkmark — the one color in the whole system that means "brand".

2 — COLOR PALETTE

One accent for the whole app. Pickpocket no longer gets its own color — sport shows up as a badge on a player's profile, not as a UI-wide theme. Windows stay monochrome so they never fight the accent.

3 — TYPOGRAPHY

Oswald for display/headings (wordmark at 500, UI headings at 700). Inter for body and labels.

4 — COMPONENT STATES

Button (single accent), and the Smart Avatar — now an elevated, isomorphic surface.

CHECK-IN BUTTON — LIVE TRANSITION

Solid and actionable when you're out. Once tapped, it confirms clearly and stops calling for action.

SMART AVATAR — ELEVATED BOX, GLOWING INITIALS, STAR BADGE
No brackets on profile boxes — the bracket motif is reserved for the logo. Being on-court now is signified by the initials glowing, never by an outline. Private = star badge. Private players show no initials at all.

5 — HOME SCREEN

Logo top-left, one accent throughout, elevated Smart Avatars, flat (uncolored) activity feed.

6 — SCHEDULE SCREEN

Weekly heatmap for a specific court. Tapping a time slot (RED BPM, outlined below) opens who's going for that slot right underneath — Smart Avatars, not just a number.
